

325093

On September 12, 2008, at 8:04 am, I called Ashland Chemical Distributing of Indiana. The facility is located at 3501 Cooper Drive in Elkhart, Indiana. I spoke with Tom Szymarek, plant manager. Mr. Szymarek stated that the facility bulks off polyester resin from tank trucks and fills the material into drums. He said that no manufacturing takes place at this facility. He also noted that the onsite ground water well is used for extinguishing fires. He stated that the well is 30 feet deep.
